Detailed Comparison between Merging and Target Sub-Funds

The below tables show the main differences between the Merging and Target Sub-Funds. The other characteristics of the Merging and Target Sub-Funds are the same.

Merging Sub-Fund Amundi Funds II – Absolute Return Currencies	Target Sub-Fund Amundi Funds Global Macro Forex
Objective	
<p>Seeks to achieve a positive return in all types of market conditions when measured over the recommended holding period.</p>	<p>Seeks to achieve a positive return in any type of market conditions (absolute return strategy). Specifically, the Sub-Fund seeks to outperform (after applicable fees) the EONIA (compounded daily) index, over the recommended holding period, while offering controlled risk exposure. For indicative purposes, given the risk profile, the return is expected to be in excess (before applicable fees) of EONIA +3% per annum.</p> <p>The Sub-Fund aims not to exceed a value at risk (VaR) of 6% (ex-ante 12-month VaR of 95%).</p>
Investment Policy	
<p>The Sub-Fund invests mainly in a broad range of currencies from around the world. The Sub-Fund may also invest in bonds (mainly short-term bonds), and money market securities and deposits. The Sub-Fund seeks to take advantage of changes in exchange rates and may hedge currency exposure. The Sub-Fund's interest rate duration is no greater than 12 months. The Sub-Fund may invest in all freely and non-freely convertible currencies. The Sub-Fund may invest up to 10% of its assets in other UCIs and UCITS.</p> <p>The Sub-Fund makes extensive use of derivatives to reduce various risks, for efficient portfolio management, and as a way to gain exposure (either long or short) to various assets, markets or income streams. This may generate a high level of leverage. In particular, the Sub-Fund may invest in forwards and options. At all times, the long positions of the Sub-Fund will be sufficiently liquid to cover obligations arising from its short positions.</p>	<p>The Sub-Fund typically invests most of its assets in money market instruments and investment-grade bonds, its performance comes mainly from investment allocation between various currency arbitrage strategies. The aim is to capture value from the highly liquid and fluctuating foreign exchange market.</p> <p>Specifically, the Sub-Fund invests at least 67% of assets in money market instruments and investment-grade bonds that are issued around the world and listed in OECD countries.</p> <p>While complying with the above policies, the Sub-Fund may also invest in deposits and up to 10% of net assets in UCITS/UCIs.</p> <p>There are no currency constraints on these investments.The Sub-Fund makes extensive use of derivatives to reduce various risks, for efficient portfolio management and as a way to gain exposure (long or short) to various assets, markets or other investment opportunities (including derivatives which focus on foreign exchange).</p>
