The Sub-Fund typically invests most of its assets in money market instruments and investment-grade bonds, its performance comes mainly from investment allocation between various currency arbitrage strategies. The aim is to capture value from the highly liquid and fluctuating foreign exchange market.

Specifically, the Sub-Fund invests at least 67% of assets in money market instruments and investment-grade bonds that are issued around the world and listed in OECD countries.

While complying with the above policies, the Sub-Fund may also invest in deposits and up to 10% of net assets in UCITS/UCIs.

a high level of leverage. In particular, the Sub-Fund may invest in forwards and options. At all times, the long positions of the Sub-Fund will be sufficiently liquid to cover obligations arising from its short positions.

There are no currency constraints on these investments.

The Sub-Fund makes extensive use of derivatives to reduce various risks, for efficient portfolio management and as a way to gain exposure (long or short) to various assets, markets or other investment opportunities (including derivatives which focus on foreign exchange).

Merging Sub-Fund Amundi Funds II – Global Aggregate Bond

Target Sub-Fund Amundi Funds Bond Global Aggregate to be renamed "Amundi Funds Global Aggregate Bond"

Objective

Seeks to increase the value of your investment and to provide income over the recommended holding period.

Seeks to achieve a combination of income and capital growth (total return). Specifically, the Sub-Fund seeks to outperform (after applicable fees) the Bloomberg Barclays Global Aggregate Hedged (USD) index over the recommended holding period.

Investment Policy

The Sub-Fund invests mainly in investment grade bonds of any type, and in money market securities, from a broad range of issuers, including governments, local authorities, supranational entities, international public bodies and corporations from anywhere in the world. These bonds are denominated in OECD currencies or other currencies that are freely convertible.

The Sub-Fund may invest up to 10% of its assets in other UCIs and UCITS.

The Sub-Fund makes extensive use of derivatives to reduce various risks, for efficient portfolio management and as a way to gain exposure (long or short) to various assets, markets or income streams.

The Sub-Fund's use of derivatives may generate a high level of leverage. In particular, the Sub-fund may invest in short and mediumterm interest rate swaps. At all times, the long positions of the Sub-Fund will be sufficiently liquid to cover obligations arising from its short positions.

The Sub-Fund invests mainly in investment-grade debt instruments (bonds and money market instruments) of issuers around the world, including emerging markets. Investments may include mortgage-backed securities (MBS) and asset-backed securities (ABS).

Specifically, the Sub-Fund invests at least 67% of assets in debt instruments that are issued or guaranteed by OECD governments or issued by corporate entities, including investment-grade MBSs and ABSs. There are no currency constraints on these investments. The Sub-Fund may invest less than 25% of the net assets in Chinese bonds denominated in local currency and investments may be made indirectly or directly (i.e. via Direct CIBM access) in Chinese bonds. The mortgages underlying the MBSs may be commercial or residential, and the MBSs may or may not have any form of government credit backing. The Sub-Fund's exposure to MBSs and ABSs is limited to 40% of net assets. This includes indirect exposure gained through to-beannounced securities (TBA), which is limited to 20% of net assets.

The Sub-Fund invests at least 80% of assets in investment-grade securities.

While complying with the above policies, the Sub-Fund may also invest in other types of debt instruments, in deposits, and in the following up to these percentages of net assets:

- convertible bonds: 25%
- equities and equity-linked instruments: 10%

- UCITS/UCIs: 10%

The Sub-Fund's exposure to contingent convertible bonds is limited to 10% of net assets.

The Sub-Fund makes use of derivatives to reduce various risks, for efficient portfolio management and as a way to gain exposure (long or short) to various assets, markets or other investment opportunities (including derivatives which focus on credit interest rates and foreign exchange). The sub-fund may use credit derivatives (up to 40% of net assets).

Merging Sub-Fund Amundi Funds II – Global Inflation-Linked Short-Term

Target Sub-Fund Amundi Funds Bond Global Inflation to be renamed "Amundi Funds Global Inflation Bond"

Objective

Seeks, in real terms, to increase the value of your investment and to provide income over the recommended holding period.

Seeks to achieve a combination of income and capital growth (total return). Specifically, the subfund seeks to outperform (after applicable fees) the Bloomberg Barclays WGILB All Markets Euro Hedged index over the recommended holding period.

Investment Policy

The Sub-Fund invests mainly in investment grade inflation-linked bonds issued by OECD governments or by local authorities, supranational entities and international public bodies, that are denominated in euro or in other currencies, provided that these are principally hedged back to the euro. The Sub-Fund will invest mainly in bonds whose remaining maturity is not greater than 60 months. The Sub-Fund does not invest in equities or convertible securities.

The Sub-Fund may invest up to 10% of its assets in other UCIs and UCITS.

The Sub-Fund makes extensive use of derivatives to reduce various risks, for efficient portfolio management, and as a way to gain exposure (either long or short) to various assets, markets **or income**

This may generate a high level of leverage. In particular, the Sub-Fund may invest in short and medium-term interest rate swaps. At all times, the long positions of the Sub-Fund will be sufficiently liquid to cover obligations arising from its short positions

The Sub-Fund invests mainly in international inflation-linked bonds.

Specifically, the Sub-Fund invests at least 50% of net assets in investment-grade inflation-linked bonds that are denominated in the currency of any of OECD or European Union member state.

While complying with the above policies, the Sub-Fund may also invest in other types of bonds, in money market instruments, in deposits, and in the following up to these percentages of net assets:

- convertible bonds: 25%
- equities and equity-linked instruments: 10%
- UCITS/UCIs: 10%

Non-euro investments are aimed to be hedged against the euro.

The Sub-Fund makes use of derivatives to reduce various risks, for efficient portfolio management and as a way to gain exposure (long or short) to various assets, markets or other investment opportunities (including derivatives which focus on credit, interest rates, foreign exchange, and inflation). The sub-fund may use credit derivatives (up to 40% of net assets).
